ZERO TARGET PISTOL

NORSTAR

This is a zero target for pistol RDS in metric distances

Adj. p Click	100m	10m	Grid
Holosun SCS	297mm	3mm	
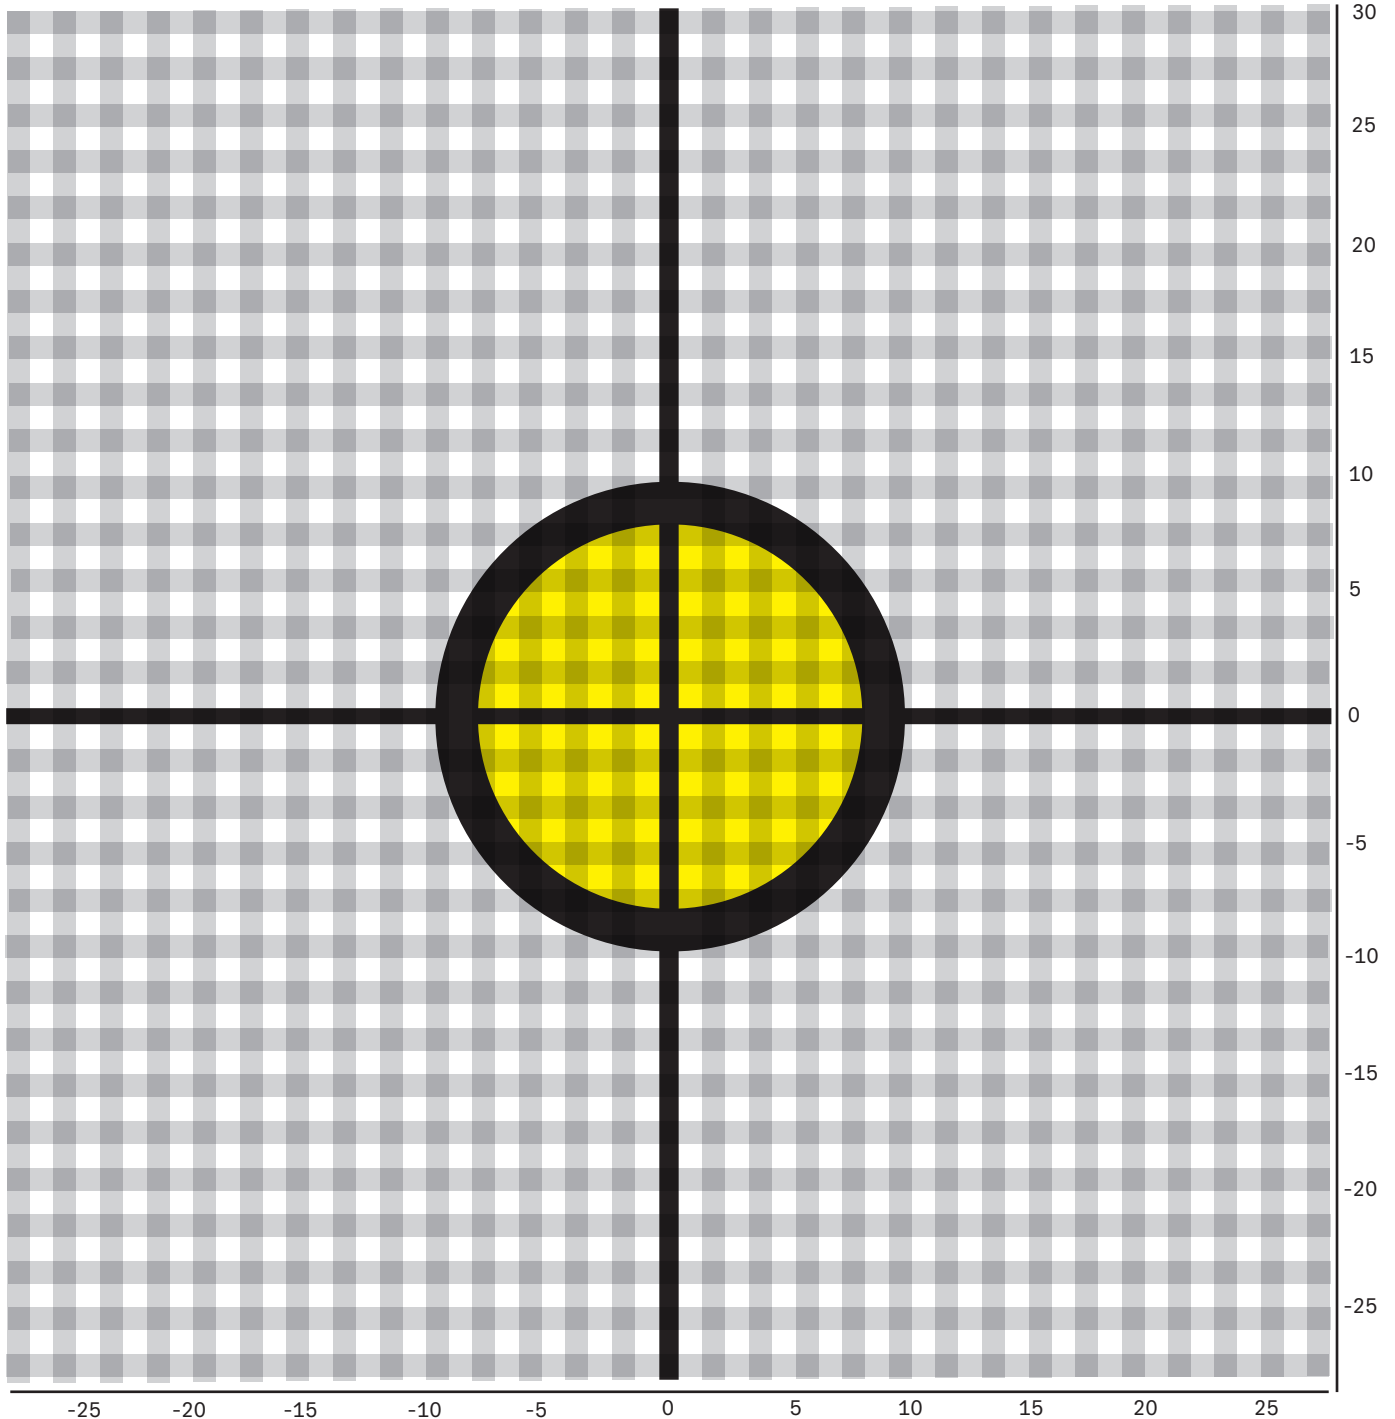

SCS
1 MOA per click

How to use:
- Get a stable shooting position, preferably supported with a sandbag or similar.
- Shoot three rounds in a tight group. Take the central point of these three impacts.
- Measure in the grid the clicks to adjust windage and elevation. Reconfirm the zero with three shots.
- One square = 1 click in the respective direction
